# MATTHEW MUESSEN

## Summary

Experienced, relentless technology professional with a diverse background and a history of success, creatively solving some of the most complex issues presented in IT today.

## Experience

### Tanium - Senior Enterprise Services Engineer

08/2020 - Current

- Deploy, configure, operate, and troubleshoot the Tanium Platform for Federal and Sled Customers. Function as onsite technical SME to ensure the customer receives the highest value from their investment in Tanium. Identify new opportunities to upsell customer on modules. Trained customers on Tanium Modules and use cases.
- Increased the endpoints managed by Tanium by over 300% within 30 days of joining first account.
- Wrote Custom Content to allow a customer live data to use when prepping for a migration from On-Prem to the Cloud.
- Foster excellent relationships with the customer which drove a business priority to continue paying for professional services and even explore increasing services by 200-300%
- Conduct Tech Panel Interviews for potential ESO new hires. Created Video Training as well as regular hands-on support for new hires to help shorten the new hire onboarding period.

### ManTech International - Principal Systems Engineer (Cyber Exercise Lead)

Quantico, VA

10/2013 - 07/2020

- Engineer and lead large scale DoD Cyber missions of 1000+ participants. Exercises executed over 2-4 week periods in complex environments, including complete buildouts of routers, switches, servers (Windows and Linux), workstations, sensors, simulated internet, traffic generation, and other components as requested.
- Gather technical exercise environment requirements with key stakeholders and C-Suite level executives. Architect and present suggested solutions utilizing the range technologies.
- Wrote host-based traffic generation and deployment scripts using Powershell and PowerCLI
- Lead/Manage a team of up to 30 engineers. Conduct technical interviews for new hires and make hire/no hire recommendations. Create, grade, and teach training assignments for new hires and entry level engineers to enable them to create, build, and run an exercise.

### ManTech International - SharePoint Developer/Software Engineer

Quantico, VA

11/2012 - 11/2013

### L-3 Communications - IMCEN IC Technical Lead

Pentagon, VA

02/2011 - 11/2012

### Navy Federal Credit Union - IT Specialist/SharePoint Admin

Vienna, VA

05/2008 - 01/2011
